

ASSIGNMENT 4

The Perfect 404

DESCRIPTION

Design the perfect 404 page for Georgiancollege.ca

INSTRUCTIONS

1. Determine who you feel would be the Primary, secondary and tertiary (if applicable) users for the site and write a paragraph explaining why.
2. Create a simple IA describing the content and features of the 404 page.
3. Create a mid to high fidelity wireframe to show layout and design.
4. Code a fully fleshed out version of your 404 design using georgiancollege.ca branding and relevant features from the existing site.
5. Ensure page is optimized for all users and current devices.
6. Post the URL somewhere accessible online.
7. Hand in a written document that would be “Client Ready” (i.e. Something you would hand directly to the client) - explaining your rationale behind the 404 IA and design.
8. Present the final product to the Client in a short presentation.

SUBMITTING YOUR WORK

Please post your file(s) or a URL to the assignment on Blackboard. This assignment may involve a variety of file formats.

- Make sure that your article includes a title, a date and your name.
- Have someone proofread your article for spelling and grammar.
- Hand the final document in as a PDF.
